

Amendments to the Drawings:

A first attached sheet of drawings includes changes to Fig. 2. This sheet, which includes Fig.2, replaces the original sheet including Fig. 2.

A second attached sheet of drawings includes changes to Fig. 4. This sheet, which includes Fig. 4, replaces the original sheet including Fig. 4.

A third attached sheet of drawings includes changes to Fig. 36. This sheet, which includes Fig. 36, replaces the original sheet including Fig.36.

Attachment: Three Replacement Sheets

REMARKS

A review of the file for payment of the issue fee discovered the following:

In Fig. 1, reference numerals 120, 115, and 140 were not mentioned in the description. Applicant has amended paragraph [0009] of the description to include reference numerals 120, 115, and 140 for the elements corresponding to those reference numerals in Fig. 1. Thus, the amendment to the description obtains correspondence between the description and Fig. 1.

In Fig. 2, reference numeral 218 is used to designate both the "numeric keyboard" and the "alphanumeric keyboard."

In the enclosed replacement sheet for Fig. 2, the reference numeral for the alphanumeric keyboard has been changed to "219" and a corresponding change made in paragraph [0032] to obtain correspondence between the description and Fig. 2. Applicant respectfully requests entry of the replacement sheet.

In Fig. 3, reference numerals 325, 330, 335, 340, and 370 were not mentioned in the description. Applicant has amended paragraphs [0035] and [0039] of the description to include reference numerals 325, 330, 335, 340, and 370 for the elements corresponding to those in Fig. 3. With respect to reference numeral 325, the structure depicted in Fig. 3 was described in the description. Thus, the amendments to the description obtain correspondence between the description and Fig. 3.

In Fig. 4, reference numeral 485 was used for both the "obfuscation descriptor" and the "virtual machine." In the enclosed replacement sheet for Fig. 4, the reference numeral for the virtual machine has been changed to "491" and corresponding changes made in paragraphs [0040], [0041] to obtain correspondence between the description and Fig. 4. Applicant respectfully requests entry of the replacement sheet.

Reference number 495 in paragraph [0043] was not shown in the drawings. Applicant respectfully notes that in Fig. 4, the virtual machine identifier is not shown as a separate element. Accordingly, reference numeral 495 was deleted in paragraph [0043] to obtain correspondence between the drawings and the specification.

Reference numerals 430, 435, 440, and 470 in Fig. 4 were not mentioned in the description. Applicant has amended paragraph [0043] of the description to include reference numerals 430, 435, 440, and 470 for the elements having those reference numerals in Fig. 4. In particular, a description was added based on the elements in Fig. 4 and the corresponding description for Fig. 3. Thus, the amendments to the description obtain correspondence between the description and Fig. 4 and do not constitute new matter.

In Fig. 5B, reference numeral 510 was not mentioned in the description. Applicant has amended paragraph [0051] of the description to include reference numeral 510 for the element having that reference numeral in Fig. 5B.

Reference numeral 550 in Fig. 5C was not mentioned in the description. Applicant has amended paragraph [0052] of the description to include reference numeral 550 for the element having that reference numeral in Fig. 5C. In particular, a description was added based on the element in Fig. 5C. Thus, the amendment to the description obtains correspondence between the description and Fig. 5C and does not constitute new matter.

Reference numerals 3110 and 3114 in Figure 31 were not mentioned in the description. Applicant has amended paragraph [0106] and [0108] to correct typographical errors in the reference numerals so that reference numeral 3110 is included in the description and reference numeral 3114 is deleted. Thus, the amendments to the description obtain correspondence between the description and Fig. 31 and do not constitute new matter.

Reference numerals 3220 and 3250 in Figure 32 were not mentioned in the description. Applicant has amended

paragraph [0113] of the description to include reference numerals 3220 and 3250 for the elements having those reference numerals in Fig. 32. The amendments to the description obtain correspondence between the description and Fig. 32 and do not constitute new matter.

Reference numerals 3610 and 3615 in Fig. 36 were not mentioned in the description. Applicant has submitted a replacement sheet for Fig. 36 in which reference numerals 3610 and 3615 have been removed. Fig. 36 does not include any information about these reference numerals and elements do not appear in the description that could be associated with these reference numerals. Thus, these reference numerals appear extraneous and so were deleted. Applicant respectfully requests entry of the replacement sheet with Fig. 36.

Applicant has amended paragraph [0036] to correct a typographical error.

Applicant has amended paragraph [0040] to correct the name of the element associated with reference numeral 482 to obtain correspondence between the drawings and the description.

Applicant has amended paragraph [0051] to correct a typographical error and thereby obtain correspondence between the drawings and the description.

Applicant has amended paragraph [0086] to correct a typographical error and thereby obtain correspondence between the drawings and the description.

Applicant has amended paragraph [0094] to correct a typographical error and thereby obtain correspondence between the drawings and the description.

Applicant has amended paragraph [0096] to correct a typographical error and thereby obtain correspondence between the drawings and the description.

Applicant has amended paragraph [0098] to correct a typographical error and thereby obtain correspondence between the drawings and the description.

Applicant has amended paragraph [0101] to correct typographical errors and thereby obtain correspondence between the drawings and the description.

Applicant has amended paragraph [0125] to correct a typographical error and thereby obtain correspondence between the drawings and the description.

As noted above, the need for the amendments to the specification and the drawings was first discovered in a final review of the application for payment of the issue fee. The amendments are of a clerical nature and simply remove any possible ambiguity. The amendments do not require any substantive consideration by the Examiner and so entry of this paper is respectfully requested.

If the Examiner's action is other than entry of this paper, the Examiner is respectfully requested to telephone Applicant's attorney. If the Examiner has any questions relating to the above, the Examiner is respectfully requested to telephone the undersigned Attorney for Applicant(s).

**CERTIFICATE OF MAILING**

I hereby certify that this correspondence is being deposited with the United States Postal Service with sufficient postage as first class mail in an envelope addressed to: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450, on August 1, 2007.

Attorney for Applicant(s)

August 1, 2007  
Date of Signature

Respectfully submitted,

Forrest Gunnison
